Harsh Kumar Chandrakar

Full Stack Web developer

As an undergraduate student, I am fascinated by new technological innovations and research in the field. I enjoy reading novels and learning about quantum computations.

- Unix
- Postman
- Golang
- NodeJs
- AWS Cloud
- Problem-solving skills
- Deployment

Languages

- English — Intermediate
- Hindi — Native or Bilingual

Work Experience

Full-Stack Developer • Hundred Solutions

January 2023 - March 2022

The main focus of my work has been on cloud-based SaaS development where I have integrated 3D models into AWS IOT Twinmaker to integrate IOT devices on 3D view. I also worked as an Odoo developer to develop custom modules and snippets.

Backend intern • WebKnots

December 2022 - January 2023

I worked on a project at this company where we developed a serverless architecture for an IOT-based parking analysis project.

Full-Stack Intern • Tortoise Creative Inc

December 2021 - April 2022

At the company, my daily work was to create a frontend using ReactJs, and a backend using GoLang, and deploy them in AWS. My primary project for the company was Lens, which was an assessment that I set up from scratch.

Software Intern • TWF Flours

June 2021 - July 2021

During the 1 month period, I gained experience working on the frontend of a B2B website, integrating the API of a Hyperlocal delivery service, and working on the SEO of the website using Schemas.
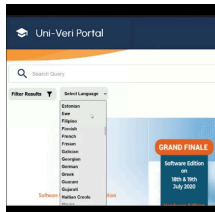

Education

2020 - 2024

Shri Shankaracharya Technical Campus
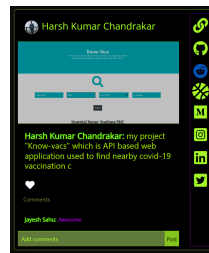

Bachelor of Technology-BTech Computer Science

Projects

SIH 2022 VS937

As part of the SIH 2022 Finals, we created a university verification portal collaboratively.

Programmer Procase

In this project, the programmer can share their work along with all hosted and supporting links.

Automation project

It was a selenium-based web scrapping project for Amazon products.

Know-Vacs

It is a web application to show nearby Covid - 19 vaccination centers and the availability of vaccines.
